### [UFO - Soviet UFO Secrets Revealed](#)

The Soviet Union has been studying UFO's for 13 years. Many UFO sightings have been seen over Russia. on August 10, 1989, Soviet military radar units picked up an unidentified flying object. The UFO was classified as "hostile." Russian defenses were put on alert, and Mig-25s released fire on the UFO and it crashed. A helicopter on the scene was hooked up to the craft, and the UFO was transported to Mozdok Air Base. There were three alien bodies-two dead, one who died a little later.

All three of the beings were about 3 1/2 to 4 feet tall, with gray outer wear. Underneath, their skin was a blue-green color with a reptilian texture. They had no hair, large black eyes covered with a protective lid, and web fingers ended their long, slender arms.
